Hiring Manager
Volvo Construction Equipment
Eskilstuna, Sweden

Subject: Application for Senior Solution Engineer: Integration Specialist – Product Lifecycle Solutions

Dear Hiring Manager,

I am writing to express my strong interest in the position of **Senior Solution Engineer: Integration Specialist** at Volvo Construction Equipment. With over six years of experience in integration engineering, APIs, and enterprise data solutions, I believe my background aligns closely with the requirements of this role and positions me to make a meaningful contribution to Volvo's mission of shaping sustainable transport and infrastructure solutions.

Having recently been shortlisted and interviewed for the **Uptime Service Administrator Internship**, I gained valuable exposure to Volvo's culture and ways of working. While I greatly appreciated that opportunity, I believe this Integration Specialist role is a stronger fit for my technical expertise and long-term career direction. My experience at IBM, where I delivered integration workflows with Azure, Databricks, and SAP-linked data flows, combined with my recent work at Ampy AB designing CRM and automation integrations, has prepared me to support Volvo CE's product lifecycle integration services with both depth and adaptability.

I am based in Eskilstuna, just minutes away from the Volvo CE office, which allows me to be flexible and present whenever needed. My wife has also been a proud member of Volvo CE for the past four years, which has given me an even greater appreciation for the company's values, culture, and long-term vision. I see Volvo CE not just as an employer but as the ideal place to build and sustain my career for the future. Importantly, I am available to join immediately, ensuring a seamless start to supporting your team's ongoing projects.

In addition to my technical skills with REST APIs, IBM MQ, SAP integration environments, and CI/CD workflows, I bring strong stakeholder collaboration, testing and documentation practices, and customer-facing onboarding experience. I am motivated to contribute to Volvo CE's API & Integrations team by ensuring reliable, high-quality integrations that support machine lifecycle operations globally.

I would welcome the opportunity to discuss how my skills and commitment can benefit your team. Thank you for considering my application, and I look forward to the possibility of contributing to Volvo CE's success in Eskilstuna and beyond.

Sincerely,

Navneeth Ramachandran
